PROJECT & INTELLIGENT OPERATIONS WORKSPACE

Manage Projects.
Digitise Operations.
Measure Impact.
Become Trade-Finance Ready.

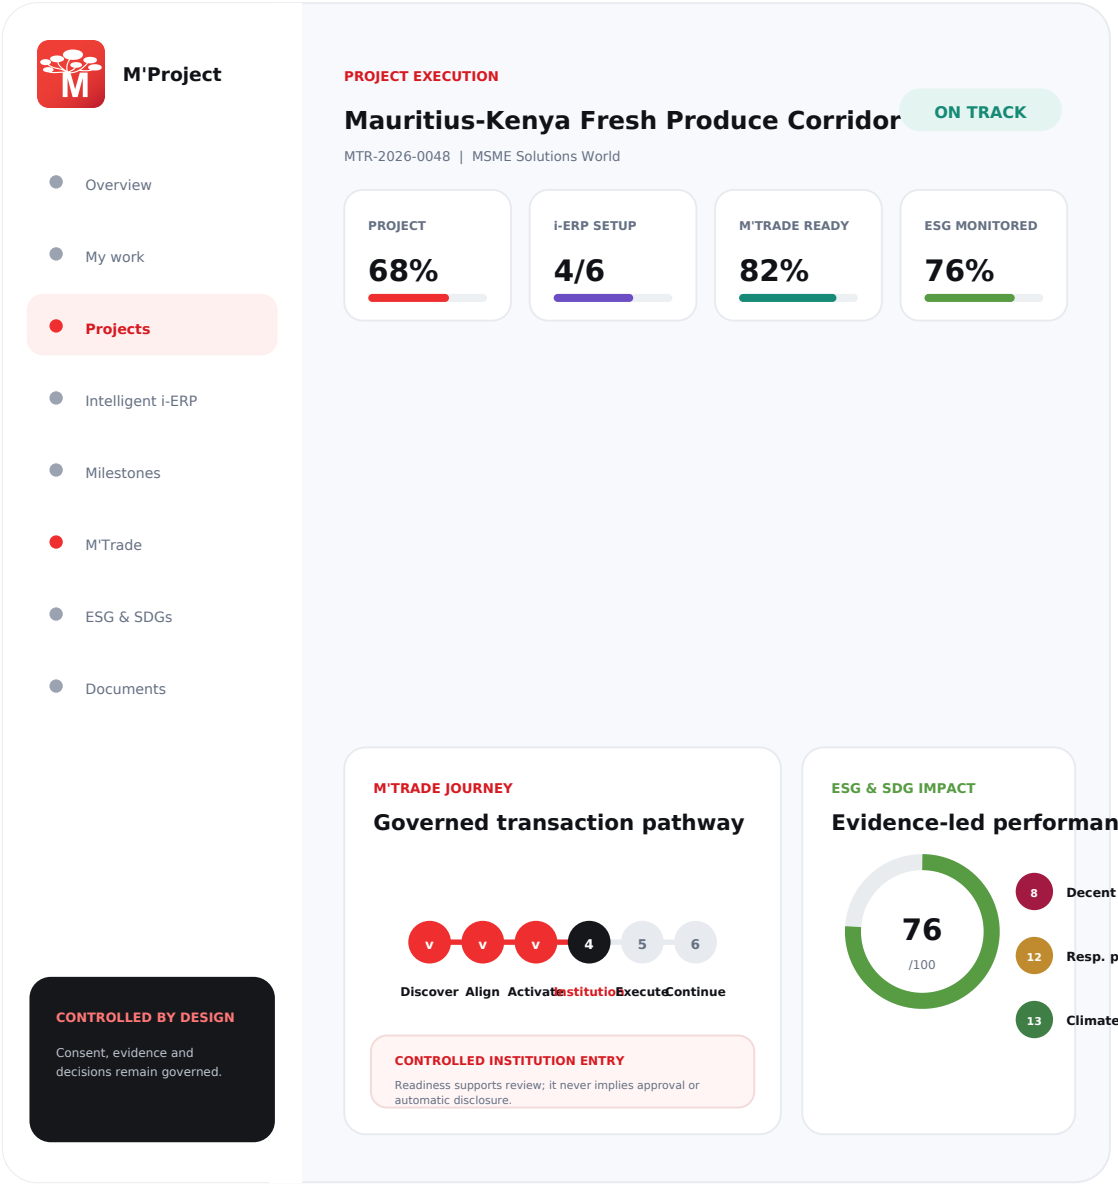

M'Project moves teams from plans to coordinated execution by connecting governance and collaboration with intelligent i-ERP setup and management, M'Trade workflows, ESG and SDG action planning, monitoring, and performance evidence - all in one workspace.

EXPLORE M'PROJECT >

SEE HOW IT WORKS

BUILT FOR

SMEs, delivery teams, advisors, institutions and governments.

WHY M'PROJECT

Projects lose momentum when execution is fragmented.

Strategies sit in presentations. Tasks live in separate tools. Decisions disappear in messages. Trade and impact evidence are assembled too late. M'Project reconnects the work.

WITHOUT M'PROJECT

Execution becomes fragmented

01 Plans and responsibilities are disconnected

02 Decisions and approvals lose their context

03 Trade readiness is assembled outside the project

04 ESG reporting becomes a retrospective exercise

WITH M'PROJECT

One command centre for delivery

YOUR PROJECT WORKSPACE
Create and manage objectives, users, milestones, tasks and timelines.

PRE-INSTALLED MANAGEMENT
i-ERP, M'Trade and ESG/SDG areas are ready to activate.

ONE GOVERNANCE RECORD
Roles, steering decisions, access and acceptance gates stay traceable.

ONE PERFORMANCE VIEW
Progress, risks, impact indicators and evidence support decisions.

CORE PROJECT MANAGEMENT

Create and manage any project from setup to completion.

The mobile design confirms a complete project-management foundation: users structure the project, organise people, plan work, control delivery and preserve decisions and evidence.

01 DEFINE THE FOUNDATION

Project setup

Create the project name, objectives, observations, budget, start date and deadline.

CORE PROJECT CAPABILITY

02 CLARIFY ACCOUNTABILITY

Users & roles

Organise clients, providers, service providers and steering-committee members.

CORE PROJECT CAPABILITY

03 CONTROL KEY OUTCOMES

Milestones & deliverables

Set owners, due dates, delivery status, observations and conclusions.

CORE PROJECT CAPABILITY

04 COORDINATE EXECUTION

Action plans & tasks

Break milestones into actions with responsibilities, dates and descriptions.

CORE PROJECT CAPABILITY

05 SEE WHAT HAPPENS WHEN

Timeline & dependencies

View Gantt-style sequencing across workstreams, phases and delivery dates.

CORE PROJECT CAPABILITY

06 KNOW WHAT NEEDS ATTENTION

Controlling & reporting

Track progress, delays, evidence, conclusions and management follow-up.

CORE PROJECT CAPABILITY

READY FROM THE FIRST PROJECT

Core project management plus three pre-installed specialist areas.

Users can create and manage their own projects, then use the integrated i-ERP, M'Trade and ESG/SDG areas without rebuilding the execution structure from scratch.

01 FOUNDATION

INCLUDED CORE

Project Management

Create, plan, staff, schedule, execute, control and report on any project.

AVAILABLE IN M'PROJECT

02 PRE-INSTALLED

OPERATE SMARTER

Intelligent i-ERP Setting & Management

Define operational requirements, configure the intelligent i-ERP progressively and manage implementation through the project.

AVAILABLE IN M'PROJECT

03 PRE-INSTALLED

TRADE WITH CONTROL

M'Trade Management

Manage transaction terms, parties, readiness, consent, institution engagement, execution and trade-finance readiness.

AVAILABLE IN M'PROJECT

04 PRE-INSTALLED

MEASURE IMPACT

ESG & SDG Management & Monitoring

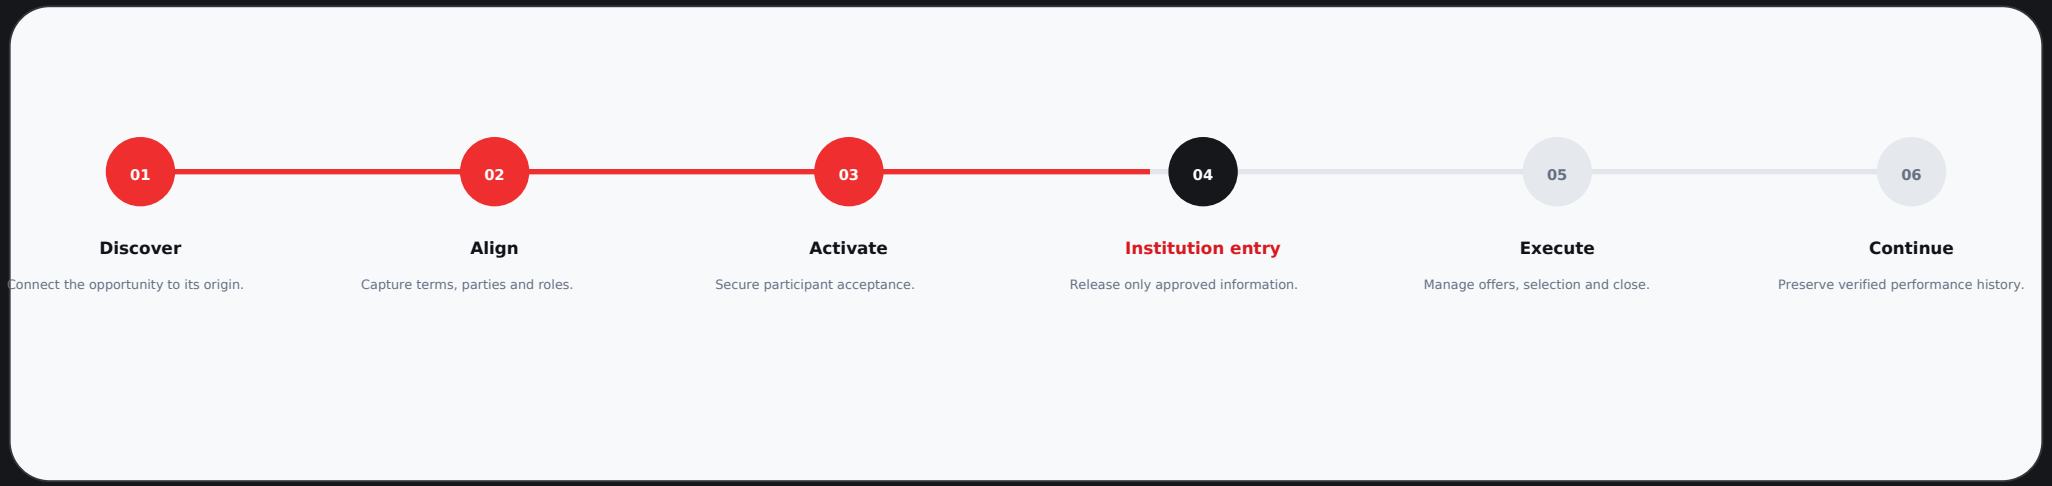

Set priorities, assign actions, track indicators, retain evidence and monitor measurable impact throughout delivery.

AVAILABLE IN M'PROJECT

M'TRADE INSIDE M'PROJECT

When a project creates trade, the transaction workflow is already there.

M'Trade connects commercial alignment, participants, readiness, consent, institution engagement and execution to the same project record.

FOR MSME BUYERS & SELLERS

A shared pathway for terms, responsibilities, evidence and next actions.

FOR PROJECT TEAMS

Transaction work stays connected to milestones, documents and communications.

FOR INSTITUTIONS

Private, permissioned review rooms support assessment under institutional governance.

M'Project and M'Trade organise evidence and workflow. Banks retain credit assessment, compliance and every regulated decision.

ESG & SDG EXECUTION

Manage impact as part of the work - not as an afterthought.

M'Project turns selected priorities into accountable actions, evidence requirements, indicators and results that remain connected to delivery.

01

Prioritise

Select material ESG themes and up to three relevant SDGs.

>

02

Plan

Define actions, indicators, owners, milestones and evidence.

>

03

Execute

Complete the work and retain records through M'Doc.

>

04

Measure

Review progress, gaps and results with operational context.

PROJECT IMPACT VIEW

What a first-time visitor understands

8

Decent work & growth

Jobs, participation and capability actions

12

Responsible production

Waste, sourcing and traceability actions

13

Climate action

Emissions and resilience measures

Evidence status reflects the project record; independent assurance can be added when required.

A SIMPLE JOURNEY

Start with the project. Add the capabilities the work requires.

M'Project grows with delivery - from initial framing to controlled execution, measurement and continuous improvement.

01 Frame

Set the objective, scope, participants and governance.

02 Align

Agree the plan, milestones, priorities and commercial terms.

03 Activate

Assign roles, accept responsibilities and configure applications.

04 Execute

Coordinate tasks, M'Trade, evidence and communications.

05 Measure

Track progress, risks, ESG indicators and readiness.

06 Improve

Preserve history and decide whether to refine, continue or scale.

WHO USES M'PROJECT

One workspace. Clear roles. Shared accountability.

01 PROJECT OWNERS

Set direction and remain accountable for delivery.

02 TEAMS & PARTNERS

Coordinate work, evidence, documents and follow-ups.

03 STEERING COMMITTEES

Review evidence and authorise agreed decision gates.

04 INSTITUTIONS

Access only permissioned views and retain decision authority.

BUILT FOR ACCOUNTABLE EXECUTION

Start with M'Project. Connect the rest of the M'World ecosystem when needed.

The final landing-page section resolves trust questions, clarifies governance and gives the visitor one direct next step.

01 CONTROLLED ACCESS

Information is shared according to roles, permissions and consent.

02 TRACEABLE GOVERNANCE

Decisions, acceptance gates and evidence remain connected to the project.

03 CLEAR INSTITUTION BOUNDARY

M'Project supports institutional review; it does not make regulated decisions.

04 MODULAR BY DESIGN

Teams activate only the applications and workflows their project needs.
